DETAILED ACTION

This application is a 371 of PCT/US05/07867 03/11/2005
which claims benefit of 60/552,690 03/12/2004.

Applicant's election without traverse of Group I, in the reply filed on 01/29/2010 is acknowledged.

compound of formula II, where R^1 is CN; R^2 is CF_3 ; each of R^3 , R^4 , R^5 , R^{6a} , R^{7a} , R^{10} , R^{12} and R^{13} is hydrogen; n is 0, Z is $CR^A R^B$, where each of R^A and R^B is hydrogen; and R^9 is 1-hydroxy-2,2,2-trifluoroethyl. Claims 1-3, 5-16, 19-30, 34, 35, 62-68, 70, 78 and 82 read on the elected species.

In an interview with Attorney of record Stephanie Seidman agreement was reached so that in view of the change in the Examiner prosecuting the case, the previously presented Election/Restriction would be withdrawn and a new requirement filed.

Claims 1-78 and 82 are in the application and subject to the following Election/Restrictions. The withdrawn claims in the claims filed 01/29/2010 are rejoined.

Groups 40-78, claims 69, 71-77, drawn to pharmaceutical methods of using compounds of groups 1-39 respectively. Thus, Group 78 corresponds to pharmaceutical methods of using compounds of Group 39.

The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The common technical a feature found in all these groups is the arylamine structural moiety (an aryl ring substituted by a nitrogen and in para-position to it by various substituents). This invariant group, dialkylaminobenzene, is not special as it is not a contribution over prior art. Compounds with such units are well known in the prior art. For example, see Diethyl aniline is commercially available, CAS Number: 91-66-7.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention or species.

Should applicant traverse on the ground that the inventions have unity of invention (37 CFR 1.475(a)), applicant must provide reasons in support thereof.

Art Unit: 1625

Applicant may submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case.

Where such evidence or admission is provided by applicant, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product

Art Unit: 1625

claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
